WHEN TO USE CHATGPT

START

Identify the task you need assistance with.

Is the task related to generating creative content, brainstorming ideas, or providing suggestions?

YES Consider using ChatGPT.

NO Proceed to the next question.

Is the task focused on providing specific, accurate information or requiring domain expertise?

YES Utilize a resource that specializes in factual information or domain knowledge (e.g., a knowledge base, subject matter expert).

NO Proceed to the next question.

Do you need real-time, interactive responses, or can the task be accomplished through a static document or resource?

Real-time, interactive responses are required: Consider using ChatGPT.

Static resources are sufficient: Use existing documentation or resources. This approach ensures accessibility, accuracy, scalability, and efficiency.

Are there privacy or security concerns that need to be considered?

YES Evaluate if ChatGPT is suitable given the confidentiality requirements. If strict privacy measures are necessary, alternative approaches may be more appropriate (e.g., internal team collaboration).

NO Proceed to the next question.

Can the task benefit from human judgment or intuition?

YES Incorporate human input/decision-making alongside ChatGPT.

NO ChatGPT might be suitable for autonomous completion of the task.
